The Computer Science and Engineering Department at Oakland University invites students to apply to its eleventh summer of an NSF-funded Research Experience for Undergraduate students. The students selected to participate will be immersed in a research environment under the mentoring of CSE faculty.

This program is a full-time comprehensive educational experience targeted to women in particular. It should be understood by the students that this position is not merely a summer job, but rather an educational experience where the students are treated as junior colleagues.

Participants will receive a stipend of $5,000 for the ten weeks, meal allowance, and travel subsidy for either travel to and from the program or to attend a conference.
